

		Parul University Faculty of Engineering and Technology Parul Institute of Engineering and Technology Artificial Intelligence and Data Science Department	
Subject Name	Artificial Intelligence	A.Y	2026-27
Subject Code	303105307	Semester	5 th
Chapter-2			
Sr No	Question	COs	B.T
1	What is application of BFS.		
2	State on which basis search algorithms are chosen.		
3	Write the difference in BFS and DFS		
4	What is the AO* algorithm, and how does it differ from traditional search algorithms like A*		
5	What are the main differences between frame-based and semantic network-based knowledge representation paradigms?		
6	What is constraint satisfaction, and how is it used in AI?		
7	What are some common heuristics used in heuristic search algorithms?		
8	What is knowledge representation and why is it an essential component of Artificial Intelligence?		
9	How does frame notation represent objects and their attributes in knowledge representation?		
10	What is an ISA hierarchy in knowledge representation? Give an example.		
11	Evaluate performance of problem solving method based on depth-first-search algorithm.		
12	Give an example of a problem for which breadth first search would work better than depth first search.		
13	Explain the following search strategies		
14	i) best first search		
15	ii) A* search		
16	Illustrate the use of predicate logic to represent the knowledge with suitable example.		
17	Define the heuristic search. Discuss benefits and short comings		
18	Discuss the following heuristic search techniques. Explain the algorithm with the help of an example.		
19	i. Hill Climbing : Steepest Ascent.		
20	ii. Best First Search: The A Algorithms.
