

Parul University
Faculty of Engineering and Technology
Parul Institute of Engineering and Technology
Artificial Intelligence and Data Science Department

Subject Name	Artificial Intelligence	A.Y	2026-27
Subject Code	303105307	Semester	5 th
Chapter-6			
Sr No	Question	COs	B.T
1	Define tokenization in NLP.		
2	What is lemmatization?		
3	Why is NLP important in the context of AI and machine learning?		
4	What does syntactic processing analyze in NLP?		
5	What is Part-of-Speech (POS) tagging?		
6	Describe what a parse tree represents.		
7	What is the difference between syntax and semantics in NLP?		
8	How does a dependency parser work?		
9	What is the purpose of semantic analysis in NLP?		
10	Define Named Entity Recognition (NER).		
11	Discuss the main goals and challenges of Natural Language Processing (NLP).		
12	Describe the process of tokenization in NLP and its significance.		
13	Explain the difference between stemming and lemmatization with examples.		
14	How does NLP contribute to advancements in artificial intelligence and machine learning? Provide specific applications.		
15	Outline the steps involved in preprocessing text data for NLP tasks.		
16	What is syntactic processing in NLP, and why is it important?		
17	Explain Part-of-Speech (POS) tagging and its role in syntactic analysis.		
18	Describe the structure and purpose of a parse tree in syntactic parsing.		
19	Discuss the difference between constituency parsing and dependency parsing.		
20	How do syntactic parsing techniques contribute to understanding natural language?
