

PARUL INSTITUTE OF ENGINEERING AND TECHNOLOGY

FACULTY OF ENGINEERING & TECHNOLOGY

DEPARTMENT OF AIDS

ASSIGNMENT – 1

1. Define cloud computing and discuss the key differences between IoT devices and traditional computers.
2. Explain the societal benefits and potential risks associated with the widespread adoption of IoT.
3. Describe the key components of the AWS platform and its role in cloud services.
4. Discuss privacy and security concerns in IoT and how cloud platforms like AWS address them.
5. Compare various cloud deployment models (public, private, hybrid) with examples.
6. Identify and explain five major AWS services related to cloud infrastructure.
