FACULTY OF ENGINEERING & TECHNOLOGY

DEPARTMENT OF AIDS

ASSIGNMENT – 2

1. Explain the concept of a Virtual Private Cloud (VPC) and its components in AWS.
2. What are subnets, and how are they used in a VPC configuration?
3. Describe the role of route tables and security groups in managing AWS network traffic.
4. What is AWS Route 53 and CloudFront? How do they support web content delivery?
5. Design a simple VPC setup with a web server and describe the step-by-step process.
6. Differentiate between public and private subnets. Give use-case examples for each.
